

WABO SC SPEED GARD

Description:

The WABO SC SPEED GARD is designed to control the speed of vehicles.

Features:

The standard gard units are 300mm wide x 60mm high at the centre tapering to 0 heights at the ends.

The maximum length of a standard unit is 12 meters.

Yellow reflective cover strips which are 55mm wide make the gard aesthetically pleasing and attractive looking and cover the fixing accessories giving it a smooth appearance.

Installation:

Fixing holes are drilled in the gard channels. After fixing to the substrate the channels are covered with the yellow coloured cover strips.
